

Project Planning & Execution Schedule

Smart Budget & Recommendation Assistant - Team Responsibility & Timeline Map

This document outlines the operational project plan for **PocketSmart AI**. It details team roles, key deliverables assigned to team members (**M. Thilothama**, **M. Pavithra**, **M. Karthika**, **M. Gowri**, **I. Suhail**), work breakdown structure, and milestone completion timelines.

1. Team Structure & Task Allocation

Individual role assignments and module responsibilities designed to ensure end-to-end delivery:

M. Thilothama

PROJECT LEAD & AI SPECIALIST

Key Responsibilities: Overall project coordination, requirement gathering, integrating Gemini/OpenAI API models for smart budget recommendations, prompt engineering, and risk management.

M. Pavithra

FRONTEND DEVELOPER

Key Responsibilities: Designing interactive user interfaces (React/Next.js, Tailwind CSS), building the expense tracker dashboard, chart visualizations, and mobile-responsive layout design.

M. Karthika

BACKEND DEVELOPER

Key Responsibilities: Setting up Node.js/Express REST APIs, JWT authentication, server-side budget calculations, request validations, and API endpoint integration with Frontend.

M. Gowri

DATABASE ENGINEER

Key Responsibilities: Designing MongoDB database schemas (Users, Transactions, Budget Targets), query optimization, data security, and cloud database indexing (MongoDB Atlas).

I. Suhail

QA ENGINEER & DEVOPS

Key Responsibilities: Unit & integration testing, bug identification and fixing, deployment setup (Vercel/Render), CI/CD pipeline management, and system performance audit.

2. Milestone Schedule & Timeline Breakdown

Phase	Milestone / Stage	Assigned Team Members	Target Duration	Status
Phase 1	Requirement Analysis & System Design	M. Thilothama, M. Gowri	Week 1 - Week 2	Completed
Phase 2	Database Architecture & Setup	M. Gowri	Week 3	Completed
